

# FIRE SUPPRESSION SYSTEMS

PROFESSIONAL PROTECTION  
WHEREVER THERE IS FIRE.

Fire Extinguishing  
Systems in  
Commercial kitchens  
KM811421  
KITEMARK™

BSEN17446:2021+A1 2024

# SAFETY ENGINEERED IN TÜRKİYE

## The New Standard in Kitchen Safety: COCINA

*"COCINA is a premium fire suppression brand, available through Green Fire, your authorized distributor and safety partner."*

By combining industrial precision with advanced chemical technology, we protect commercial kitchens, electrical cabinets, and heavy-duty vehicles, delivering long-lasting systems featuring premium chrome components.

## Why COCINA?

Certified Safety  
BS EN 17446:2021 + A1 2024 certification by BSI.

ECO Design  
reinstallation and affordable  
maintenance.

Nature Friendly  
Non-toxic and  
environmentally safe  
agents.

# AGENT TECHNOLOGY

## "FLAME KILLER"

### Advanced Chemical Engineering

COCINA systems utilize "Flame Killer," a specially formulated wet chemical agent designed to combat grease fires (Class F).

Based on high-performance Potassium Carbonate.

#### Technical Properties

---

Boiling Point **108.9°C (Rapid Cooling)**

---

Chemical Base **Potassium Carbonate**

---

Appearance **Clear, Odorless**

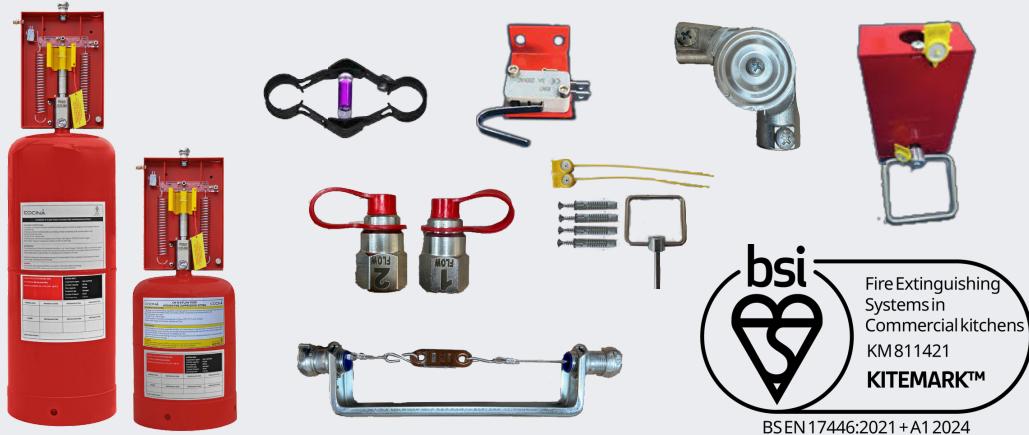

---

**pH > 11**

High Alkaline

# COCINA MECHANICAL - CM SERIES

## Pure Mechanical Reliability

*"The CM Series operates on a purely mechanical and hydraulic principle. It guarantees 100% activation reliability without relying on external power or pressurized cartridges."*

- Auto Activation (Thermo Bulb)
- Manual Pull Station
- Expands up to 5 Cylinders
- Gas Shut-Off Compatible

Model	Capacity	Flow Rating	Standart Kit
COCINA CM10	10 Liters	8 Flow	6pcs- 1 Flow Nozzles, 1pc 2Flow Nozzles, 1pc - Thermobulb, 5 pcs -Corner Pulleys, 1 pc - Pull Station, 1 pc - Microswitch
COCINA CM20	20 Liters	16 Flow	12pcs- 1 Flow Nozzles, 2pcs 2Flow Nozzles, 3pcs - Thermobulb, 8 pcs - Corner Pulleys, 1 pc - Pull Station, 1 pc - Microswitch

# COCINA PNEUMATIC - CP SERIES

## Sensor Tube Technology for Fast Detection

BSEN 17446:2021+A1 2024

*"The CP Series utilizes a patented Thermoplastic Detection Tube that runs throughout the hood area. The moment a fire starts, the tube ruptures at the hottest point, instantly activating the system."*

- Continuous Detection: The entire tube acts as a linear sensor.
- Flexibility: No moving mechanical parts in the detection line.
- Standard Tech: Comes with a Pressure Switch for BMS integration.

Model	Capacity	Flow Rating	Standart Kit
COCINA CP10	10 Liters	8 Flow	6pcs- 1 Flow Nozzles, 1pc 2Flow Nozzles, Tubing, Cylinder Bracket
COCINA CP20	20 Liters	16 Flow	12pcs- 1 Flow Nozzles, 2pcs 2Flow Nozzles, Tubing, Cylinder Bracket

# COCINA ELECTRONIC - CE SERIES

Smart Integration for Modern Facilities

*"Designed for buildings requiring full integration with Fire Alarm Panels and Building Management Systems (BMS). It utilizes the D100 Electromechanical Detector."*

## D100 Electromechanical Detector

World's first commercially available electromechanical heat detector. Uses UL-listed Job bulbs (57°C - 182°C). Anodized Aluminum body suitable for harsh kitchen environments.

Model	Capacity	Flow Rating	Standart Kit
COCINA CE10	10 Liters	8 Flow	6pcs- 1 Flow Nozzles, 1pc 2Flow Nozzles, D100 Electromechanical Detector, Cylinder Bracket
COCINA CE20	20 Liters	16 Flow	12pcs- 1 Flow Nozzles, 2pcs 2Flow Nozzles, D100 Electromechanical Detector, Cylinder Bracket

# WHY BS EN 17446:2021 + A1 2024

## A Higher Standard of Safety Compared to UL 300

### Deep Fat Fryers & Range Tops

ACCEPTANCE CRITERIA	UL 300	EN 17446
2-minute pre-burn	●	●
No reignition within 20 minutes	●	●
Flames smaller after 10 seconds		●
Some fuel must remain after discharge		●
No grease droplets 200 mm away	●	●

*"COCINA systems are tested against the rigorous European Standard EN 17446, offering superior protection criteria."*

### Griddles & Broilers

ACCEPTANCE CRITERIA	UL 300	EN 17446
60-second prev-burn *	●	●
No reignition after 5 minutes	●	●
Flame extinguished upon complete discharge	●	●
Flames smaller after 10 seconds		●
Some fuel must remain after discharge		●

\*Broilers pre-burn 30 or 60 seconds, depending on the type

# COCINA CABINET SHIELD

## Direct Low Pressure (DLP) System

"A compact, standalone fire suppression system designed to protect electrical cabinets, server racks, and enclosed machinery."

### Micro-Environment Protection

Agent **FK-5-1-12 (Clean Agent)**

Activation **Turbing bursts at 100°C-110°C**

Pressure **15 Bar Low-Pressure**

Model	Capacity	Application
CS-1	1 kg	Small Panels
CS-2	2 kg	Small Panels
CS-3	3 kg	Medium Racks
CS-4	4 kg	Medium Racks
CS-5	5 kg	Large Cabinets
CS-6	6 kg	Large Cabinets

# COCINA VEHICLE SAFER

## Automatic Vehicle Fire Suppression System

*“Native engineered protection designed for engines of buses, trucks, construction machinery, and marine vessels.”*

### Micro-Environment Protection

Agent **Special Wet Chemical**

Activation **D100 Electromechanical detector**

Pressure **15 Bar Low-Pressure**

Model	Capacity	Standart Kits
CS-4	5 lt	1 pc button, 4 pcs nozzles, 1pc D100 dedector
CS-6	7.5 lt	1 pc button, 6 pcs nozzles, 1pc D100 dedector
CS-8	10 lt	1 pc button, 8 pcs nozzles, 2 pcs D100 dedector
CS-16	20 lt	1 pc button, 16 pcs nozzles, 4 pcs D100 dedector
